Move Images, Run Computers, And Even Control Video Games With Just Your Thoughts

Have you ever controlled a computer with your mind, used your moods to create music, or skied down a mountain just by thinking left or right? Now you can.

Welcome to MINDDRIVE.

Although found in science fiction novels and countless movies, using only your thoughts to initiate movement and actions has been but a dream. Now, joining the other breakthroughs of the 20th Century, that dream has become a reality. MindDrive is the first computer product operated by human thought — enabling you to use your mind in new ways, and have fun at the same time.

Using MINDDRIVE is astonishingly simple.

Whether you are 7 or 70, you will begin enjoying the MindDrive almost immediately. Learning to use this wondrous new technology is extremely easy, fast, and fun.

Investing in the future of your mind:

When you bring home a MindDrive, you're gaining access to an all new library of entertainment and educational experiences. There are games for all family members, where success depends on how well you maneuver your thoughts — not just how fast you move a joystick. And MindDrive's all new educational programs focus on invaluable skills like Concentration, Creativity, Memory, and Peak Performance.

"Just the power of your mind"

MINDDRIVE An experience unlike any you have ever had before.

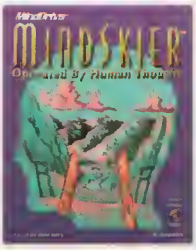
The Other 90%™ TECHNOLOGIES, INC.

The first computer product operated by human thought

MindDrive™

All new uses for your home computer.



MindSkier™

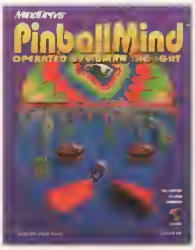
Using just your thoughts, ski left and right, in and out of Slalom gates.

FIB™

MindDrive helps you decide whether or not your friends are telling a fib.

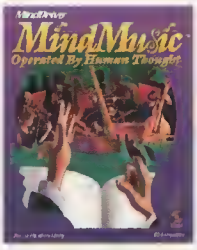
MindFlight™

With your thoughts, fly through canyons, under bridges, and around buildings.



PinballMind™

Activate the flippers with your mind and use your thoughts to affect the movement of the ball itself.



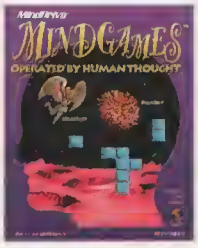
MindMusic™

Compose music with your thoughts, then use your mind to conduct an orchestra or rock group.

"Learning MindDrive is Astonishingly Simple"

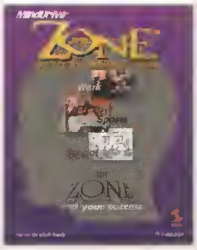
MindBowling™

Bowl a strike by guiding the ball down the alley with just your thoughts.



MindGames™

Three fun and classic style games — MindWings, MindBlox and PlanetBall — now controlled by your thoughts.

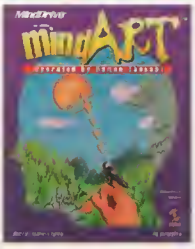


The Zone™

How do athletes or writers get into the "Zone"? Learn to achieve and maintain this elusive state.

Get Smart™

Use this unique program to enhance your memory, creativity, and concentration.



MindArt™

Draw a picture on screen with your mind — then print it.
